

Stage 6.3 local-ID ridge fits by work zone

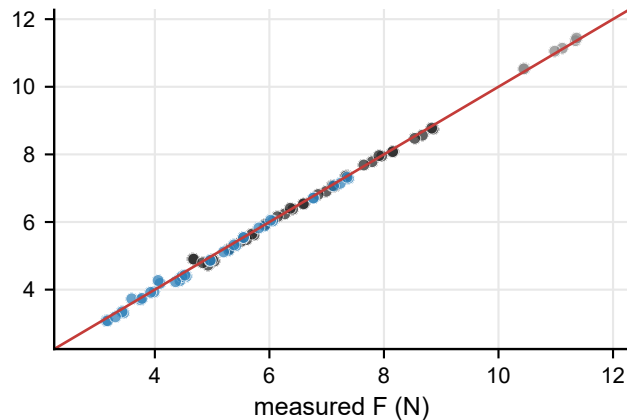

Each column is a held-out work zone; top row predicts force, bottom row predicts displacement.

● direct loading ● preload deep ● return unloading

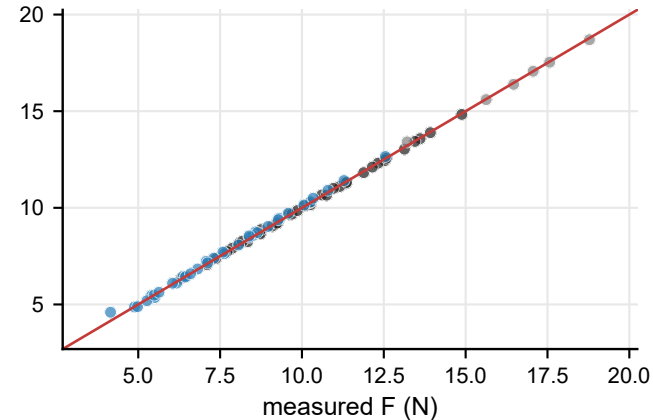

1.8-2.6 mm
F MAE=0.108 N

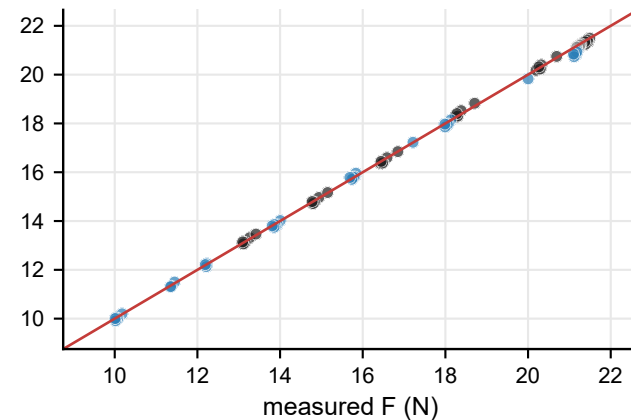

2.4-3.2 mm
F MAE=0.076 N

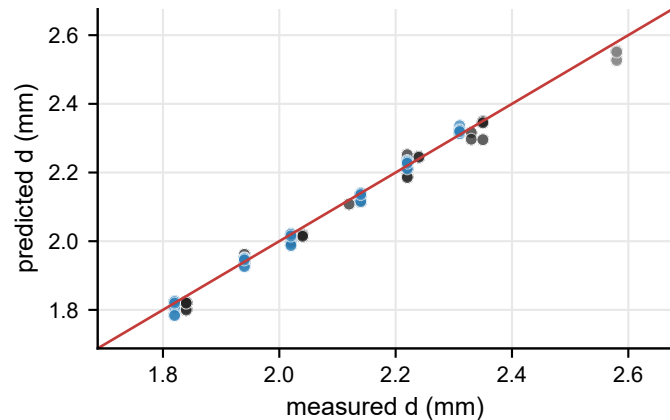

3.0-3.8 mm
F MAE=0.069 N

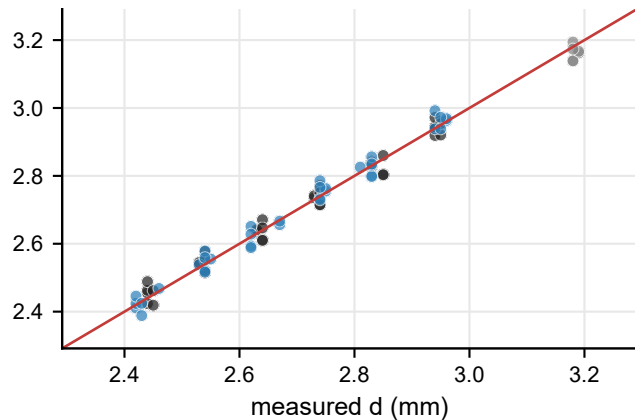

3.4-4.2 mm
F MAE=0.077 N

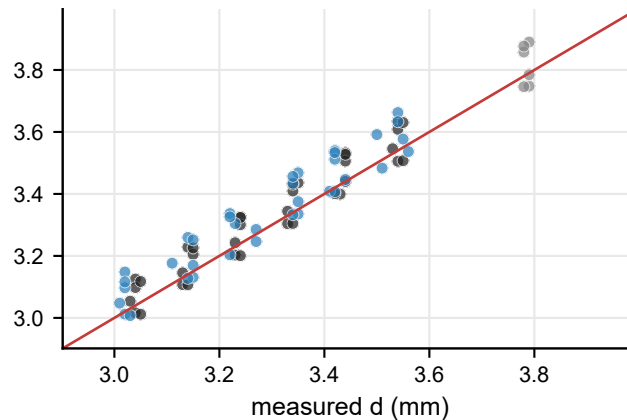

d MAE=0.016 mm

d MAE=0.019 mm
