

Stage 6.3 MLP held-out fits

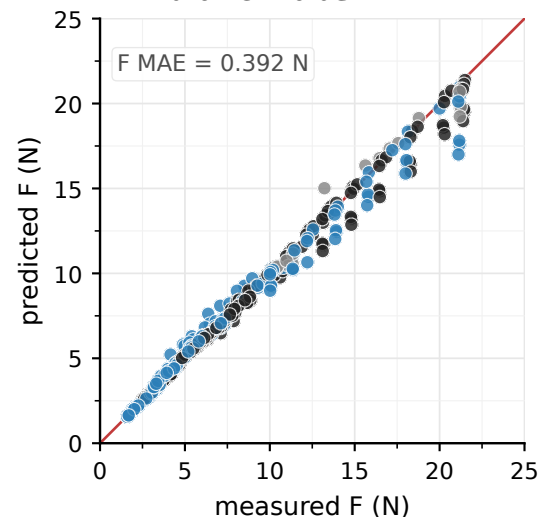

Plain magnetic, branch-label, path-memory and local-identifiability features tested on the same held-out dense-loop states (train = 1461, held-out = 312).

● direct loading ● return unloading ● preload state — ideal 1:1

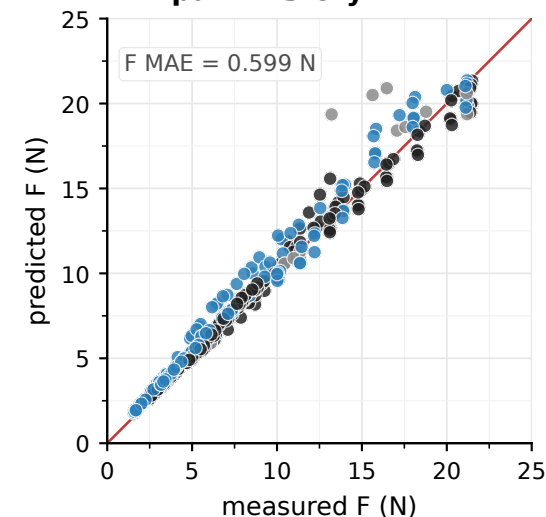

**a Plain magnetic MLP
B only**

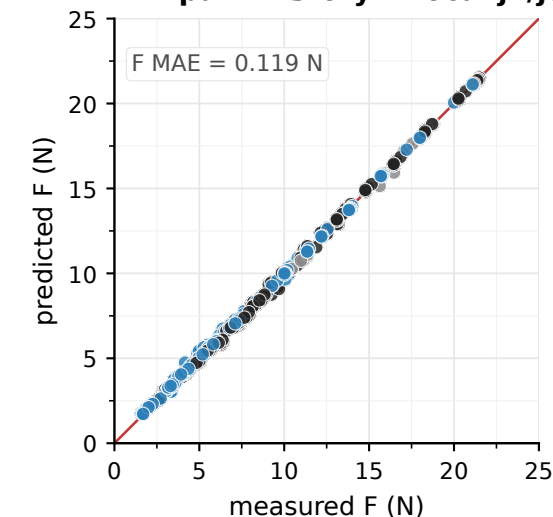

**b Path-label MLP
B + branch label**

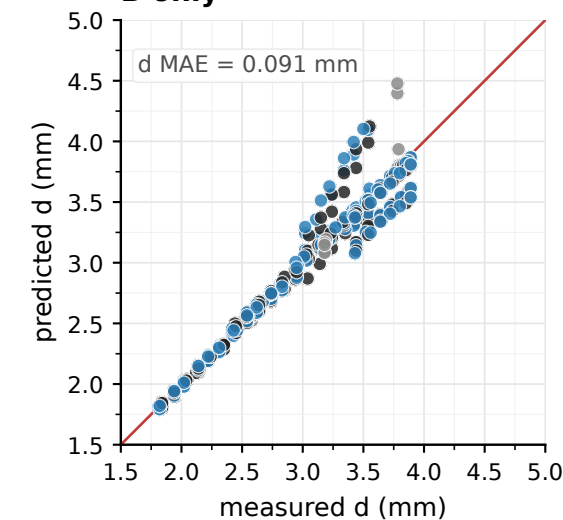

**c Path-memory MLP
B + path history**

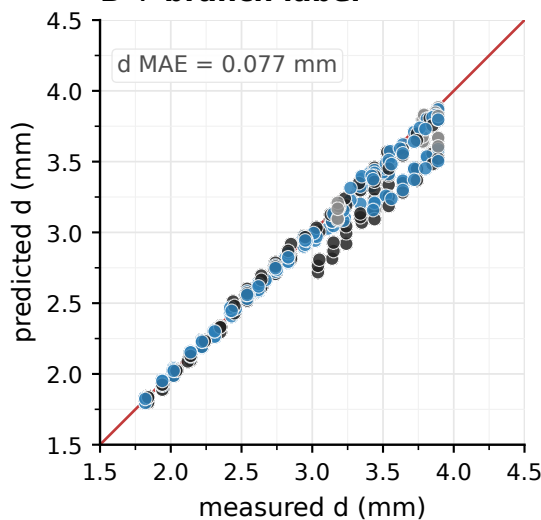

**d Local-ID MLP
B + path history + local jF/jd**

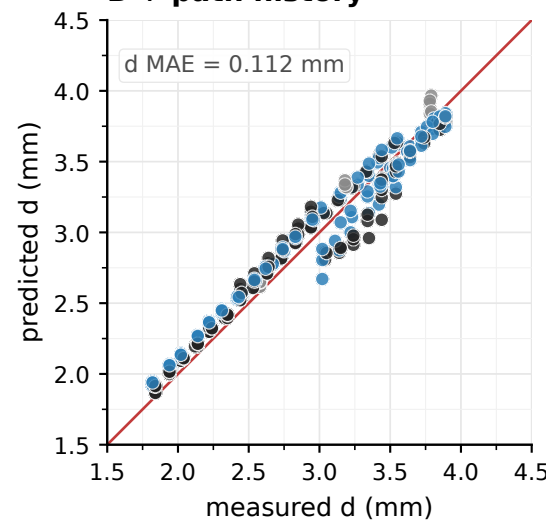

**e Plain magnetic MLP
B only**

**f Path-label MLP
B + branch label**

**g Path-memory MLP
B + path history**

**h Local-ID MLP
B + path history + local jF/jd**
